## **Mazzei Injector Company and Energenecs Partner**

**BAKERSFIELD, Calif. (July 25, 2018)** — Mazzei Injector Company and Energenecs are teaming up. Mazzei’s patented technologies provide solutions for a wide-range of applications in the water and wastewater fields. This makes it necessary for Mazzei to find a firm to represent them with a broad-based understanding of water and wastewater processes—the hunt has been difficult. Fortunately for Mazzei, Energenecs has a team of talented engineers and technicians with a comprehensive knowledge of the field. And Energenecs prides itself in only supplying efficient and innovative process equipment to their water and wastewater clients in the upper Midwest, exactly what Mazzei offers so they thought it was a good fit for them too.

“Not only does Energenecs have an exceptional engineering and technical base, but they also have the same company culture that Angelo built Mazzei on... they highly value their relationships and stand by their clients. Another indication that we found the right partner,” said Jim Lauria, VP of Sales and Marketing at Mazzei.

“We don’t enter into these arrangements lightly—the systems that we sell have to be world-class, and that is what Mazzei builds,” commented President of Energenecs, Jared Feider.

Both Mazzei and Energenecs are looking forward to a long and prosperous relationship.
