### **Mazzei Chemigation – The Simple, Low Cost Solution for Agriculture**

Chemigation is the process of injecting chemicals into an irrigation system. Only Mazzei offers simple-to-use, low cost solutions. Using high-efficiency Venturi injectors, Mazzei's chemigation technology delivers precise and safe applications. With no moving parts, and often no supplemental pump system, Mazzei is the right choice. Mazzei patented designs are precisely engineered and cannot be duplicated. Imitations and look-alike products simply do not perform like a Mazzei.

### **Mazzei Chemigation – Efficient Fertilizer Application**

Injecting fertilizer into a pressurized irrigation system is the most common application for Mazzei injectors. With Mazzei you get the advantages of a non mechanical chemigation system that is easy to maintain. You get precise mixing and uniform distribution of material into the water stream. Mazzei injectors are designed for vacuum transfer of irrigation chemicals, providing additional chemigation safety.

### **The Mazzei System**

- ▶ **Easy to Install**
- ▶ **Uniform Chemical Injection Rate**
- ▶ **Low Cost Solution**

***Mazzei chemigation injectors are available from quality irrigation dealers throughout the world. Contact your irrigation design consultant today!***
