Mazzei Introduces Promotion of Key Staff Members

BAKERSFIELD, Calif. — The Mazzei Injector Company, LLC, the world’s largest manufacturer of high performance “venturi” type injectors, has named Celia Mazzei as its Director of Research and Development and Richard Fanucchi as Production Manager.

Celia Mazzei joined the company in 2005 and performed several roles including marketing and sales functions that included literature and advertisement design, Web development, technical sales and engineering, and product testing. In her new position as Director of Research and Development she will head the company’s new product research, patents and intellectual property stewardship, as well as continue product testing and validation, and sales support.

Richard Fanucchi has been with Mazzei for nearly nine years, first in technical support and sales with an emphasis on the agriculture market and most recently as manager of agricultural sales. In his new role as Production Manager he will be responsible for all equipment Bill of Materials, purchasing, pricing, vendor management, quality control, equipment assembly and warehouse functions. He will also continue to oversee the company’s IT functions.

In making the announcement, Mazzei President Bill Van Skike said, “These are two new key positions that resulted because of the growth the company has experienced in the past few years.” Mr. Van Skike noted, “New technologies and innovations are driving the market place and Celia Mazzei’s background and experience in these areas are a perfect fit.”

“Richard Fanucchi brings a wealth of hands on experience and knowledge of the company to his new role as Production Manager,” said Mr. Van Skike. “He will be instrumental in ensuring that Mazzei’s high quality standards of production and delivery are maintained as Mazzei continues to grow and expand.”

###

About Mazzei

Founded in 1978, the Mazzei Injector Company, LLC is headquartered in Bakersfield, California. Known worldwide for its mixing and contacting technologies, the company manufactures patented products and processes including high performance “venturi” type injectors for the agricultural, municipal and industrial water and wastewater, pool/spa and wine industries.
